Dear Mr Yusuf Mansoor,

This letter serves to confirm that the inks we use to produce your sticker strips, posters, colour in sheets and activity cards for your lucky bags are the Intense series range of inks from Sun chemicals in Europe.

As you will see on the attachment these inks comply with the EN 71/3 (TOY REGULATIONS) and CONEG.

I am sure you are aware of how strict the EU regulations are and can assure you that these inks are free from heavy metals and toxins.

Best regards,

Clinton Buchanan.

## INTENSE™

Intense sheetfed offset inks for 4-colour process printing. INTENSE™ provides excellent print definition and ink trapping resulting in brilliant prints. For use on all types of sheetfed presses including 8,10 and 12 colour perfecting machines. Exceptional lithographic stability. Fast setting and rapid drying for fast further processing. Suitable for publication and commercial printing.

Complies with industrial standards including as EN 71/3 (Toy regulations) and CONEG.

### INTENSE™ Product references

	Product Code	Light fastness ISO 2835	Alcohol ISO 2837	Solvent Mixture ISO 2837	Alkali ISO 2838
INTENSE™ YELLOW	INT 09	5	+	+	+
INTENSE™ MAGENTA	INT 39	5	+	+	-
INTENSE™ CYAN	INT 38	8	+	+	+
INTENSE™ BLACK	INT 24	8	-	-	+

### Characteristics

Duct fresh	Drying by absorption and oxidation
Excellent lithographic performance	Very fast absorption and setting*
Very good perfecting properties	Very good stack capability*
Based on vegetable technology and mineral oil free	Fast work and turn*
Excellent ink trapping	Good gloss*
	Very good mechanical resistance*

\*Dependent on substrate

### Fountain solutions

INTENSE™ is compatible with a wide range of fountain solutions with and without isopropyl alcohol (0-12%). Sun Chemical recommends the following ideally adapted products :

SunFount 410 ; suitable for 5-7% IPA in normal water qualities

SunFount 430 ; suitable for 5-7% IPA, where reduced tendency to roller glazing is required

For printing at 0-5% alcohol and for assistance in choosing the fount additive best suited to the printing conditions and water, please consult our technical services.

### Additives and press auxiliaries

INTENSE™ process inks are duct fresh and supplied ready to print.

### Ink packaging

INTENSE™ is supplied in 1 kg and 2.5 kg vacuum sealed tins and 200 kg drums.

For further detailed application advice please contact our technical services. Material Safety Data Sheet available on request.
